Education

Bachelor of Science
Computer Science
University of Missouri

Dec 2026
GPA: 3.57/4.0
Columbia, Missouri

Experience

Undergraduate Research Assistant

Columbia, MO

Digital Biology Lab

Dec 2025 – May 2026

- Analyzed large-scale biological datasets using Python (Pandas) and SQL, performing data cleaning, validation, and exploratory analysis.
- Developed and executed data validation checks, identified inconsistencies through root-cause analysis, and validated results before reporting findings.
- Collaborated with research stakeholders to document requirements, summarize findings, and develop repeatable data-processing workflows.

Peer Learning Assistant

Columbia, MO

University of Missouri, Department of Computer Science

Jan 2026 – Present

- Explained complex programming, statistics, and data concepts to students with varying technical backgrounds; actively contributed to knowledge sharing and collaborative learning across the department.

Projects

U.S. Airline Performance Data Warehouse & Analytics | *Python, Pandas, Snowflake, SQL, Tableau*

- Built an end-to-end ETL and analytics pipeline processing 33.65M U.S. domestic flight records (2021–2025) using Python, Pandas, and Snowflake.
- Designed a layered Snowflake warehouse with RAW, STAGING, and ANALYTICS schemas, including fact/dimension tables for airline, airport, date, and flight-level analysis.
- Developed SQL analyses and 3 interactive Tableau dashboards to evaluate on-time performance, cancellations, delay causes, airport operations, airline reliability, and route performance.

Retail Analytics Platform | *Python, NumPy, PostgreSQL, SQL, Tableau*

- Designed and tested end-to-end ETL pipelines using Python, Pandas, NumPy, and PostgreSQL; wrote and optimized SQL queries for data extraction, transformation, validation, and reconciliation to ensure accuracy, completeness, and consistency across sources.
- Presented analytical findings and dashboard insights to stakeholders, translating complex data into clear, actionable business recommendations for both technical and non-technical audiences.
- Developed and maintained interactive Tableau dashboards, reports, and visualizations to support operational reporting, KPI tracking, sales trend analysis, and customer segmentation, enabling data-driven business decisions.

HR Analytics Dashboard | *Excel, Pivot Tables, Data Visualization, Kaggle*

- Built an interactive HR Analytics Dashboard in Excel using Pivot Tables, Pivot Charts, KPI Cards, and Slicers to track workforce trends.
- Conducted exploratory data analysis to identify workforce trends, key performance indicators (KPIs), and attrition drivers; generated actionable recommendations to support business decisions and process improvement initiatives.

MySQL Layoffs Data Analysis | *MySQL, SQL*

- Cleaned and standardized a global layoffs dataset using staging tables, ROW_NUMBER(), data transformations, and null-value handling.
- Performed EDA using CTEs, aggregate functions, and window functions to analyze company, industry, country, and time-based layoff trends.

Technical Skills

Languages: Python, SQL, JavaScript

Analytics & BI: Excel, Power BI, Tableau, Oracle Analytics Cloud, ETL, EDA, Data Visualization

Databases: PostgreSQL, MySQL, SQL Server, Snowflake, MongoDB, Oracle

Tools & Platforms: NetSuite, Git, Microsoft Office, VS Code
